3 days ago

★★★★★ NC Solar Now installed a passive solar pool heater for me about 4 years ago. The system works like a charm, keeping the pool warm during the colder seasons with no operating costs. I had a recent maintenance issue and contacted the company. They were incredibly responsive. I highly recommend considering NC Solar Now.

★★★★★ I was extremely pleased with my service with NC Solar Now. From the beginning of the process with the sales representative, Patrick he was very knowledgeable during the discussion and diligent with his follow up. The installation went smoothly and was completed in a timely manner and has been exceeding our expectations for solar production. I would highly recommend NC Solar Now in the future.

★★★★★ I am incredibly happy to work and be a customer of this family-owned local solar installer. Over the years, NC Solar Now has been fortunate to serve many happy clients transition to solar energy. With their in-house team, electricians, and install team, NC Solar Now is incredibly qualified to do any size solar energy installation.

★★★★★ Did over a year of research before buying my system and boy did that payoff. NC Solar Now has passed my expectations over and over. The sales experience was not pushy but very informative. I started only wanting Solar Hot Water but once the salesman showed me how affordable the electric panels were I could not resist. The solar review was really cool with the flying the drone over the house. Then the engineering design was emailed to me showing exactly where all the panels were going on the roof and where all the new electric boxes would be. We approved that right away and within a few days, they were calling asking to schedule the install. We agreed on a date and of course, it was supposed to rain that afternoon. The installers called me the day before to confirm and I mentioned the rain and they were watching the weather also and said they had a plan to do the roof work first then the inside and should be done before the rain starts. Six men showed up at 8am and were on the roof within 15 minutes. This crew was excellent at teamwork and were also very patient and friendly answering all my crazy questions. Before I knew it the panels were going on the roof and the whole process was completed by 1pm. This whole process from start to finish was more than 5 stars but that is all I can give.....THANKS AGAIN NC Solar Now

Our experience with NC Solar Now was excellent - from the initial sales contact to the installation and follow-up. They were very transparent and professional, telling us exactly what would happen and when. And they managed the entire process - which included various electrical installations and inspections - so we did not have to worry with appointments and communications. Also, the installation team was very respectful of our property (and our indoor/outdoor animals) and left things just as they had found them. Overall, it was a great experience!

We love NC Solar Now! We decided to get a solar array to offset our electrical footprint. From reception, to sales, to planning, to installation, everyone was wonderful! Everyone was very knowledgeable and oh, so very nice! We will use them to upgrade our system sometime in the future and we will recommend them to anyone who will listen! Thanks to them all!

The staff is extremely helpful and knowledgeable. After looking into multiple solar companies in the region, I found they they are the best, in every way.

Natalie Paez

17 weeks ago

The team at NC solar now has been amazing from the beginning. From the presentation to installation and everything in between. They are impeccable on communication and they literally handle everything. No need for me to deal with the power company. They even handled our HOA paperwork. They make sure you are involved in every decision but still make this process seamless. Great company doing great things.

★★★★★ I was driving from NC to PA. Sent a request for a quote to NC Solar Now after looking at other companies to install panels. Within minutes Greg from NC Solar Now contacted me and emailed me all the information so I could read once I arrived in PA. Once I read the information, Greg and the staff was readily available to answer all questions and work with me to find the right set up for my house. Their install team is incredible. They were quick and very professional. In fact, the newspaper did an article on the house and install. Lastly, even after the install, they are available to talk to and explain the electric bill and savings to me. All in all ...Excellent service and knowledgeable staff that is willing to help any way they can. Highly recommend NC Solar Now to install over any other company out there. Contact NC Solar Now for all your Solar Needs. 7KW installed and looking to add to the investment of solar panels we had installed

★★★★★ Add a little bit of These guys made it easy. From the initial visit from Sales through installation it was easy, clean and no hassle. Complete turnkey including dealing with the power company and inspections. 16 panels and the inverter were installed in less than 6 hours. It was clear NCSN has done enough installations to make doing it almost automatic; everyone knows their job. I was fortunate to find the right company.text

Jim Bulbrook

★★★★★ After doing a lot of research I decided on a large 15kW array. I contacted several companies for quotes and NC Solar Now was very competitive and willing to work with the technology I was interested in - Solar Edge with the LG Neon II panels. There are pros and cons to all solar installations but I felt like this was the best combination of price and features. NC Solar Now was very patient with me as I built my new home and they checked in every few months on the progress. When it was time to install the panels they did a professional job on all of the paperwork submitted Duke Energy, they arrived on schedule, and did a great job installing the array. I highly recommend them as they have great service and follow up even after the job is complete.

Miles Jackson

40 weeks ago

I am very pleased with our solar system, installed by NC Solar Now! They were very responsive and very knowledgeable about everything related to solar. The entire job was done beautifully, and in a timely fashion too. I highly recommend them to anyone interested in solar power! P.S. their price handily beat the other companies I contacted as well, with the same or comparable equipment!

Brandon Latham

40 weeks ago

NC Solar Now has been the best all around small business to work with- not just in the solar industry. They offered me a superb price for my system compared with many other competitions who were twice as high in cost and who were trying to take advantage of unknowingly potential customers who know nothing about what solar should cost. From communication to installing, they are there every single step of the way to answer any questions you have to easily explaining what to expect in getting to know your system. If you are trying to save money on your electrical bill, be more eco-friendly, and have a great return investment - solar is the way to go. So before you go signing away with another solar company give this honest company a chance at a quote! Most satisfied customer, Brandon L.

Jesse Brown

The best all around small business solar company in NC. A great group of honest people that work here. If you are thinking of going solar, please do not hesitate and at least let them give you a quote. Capital Auto Glass

Jim Barton

43 weeks ago

I have dealt with NC Solar Now since I was first interested in getting panels. They were very helpful in helping to get me setup and have been polite and fast with everything. When I call I speak to people and don't spend time dealing with an automated system. If any problem arises they are fast to respond and even credited me when my system went down due to a power surge. Great people!

James Rohal

★★★★★ The entire process was very professional and exactly as described. I would recommend the NC Solar Now team for a solar installation.

Jeff Lock
47 weeks ago

★★★★★ NC Solar Now is a very professional, very courteous and most importantly, very cooperative organization. The solution itself is professional looking and blends nicely with my house. During the entire project, I felt like I was part of a team and that my solar panel placement, home value, and HOA approval was just as important to them as it was to me. I asked a lot of questions regarding the technical and maintenance aspects of having solar as an energy generating system and all my questions were answered in ways that I could understand and make appropriate decisions on the project. Thank you NC Solar Now!

Andrew Lawler
May 16, 2017

★★★★★ NC Solar is very easy to work with and very professional. All work was performed in a timely and professional manner.

Adam Haile
May 16, 2017

★★★★★ After speaking to and getting quotes from 4 different solar installers I was happiest with NC Solar Now both because I felt they had the best solar equipment, best price, and were by far the best to work with. They walked me through the entire process, all the numbers, and happily put up with my extensive questions. They were extremely professional and knowledgeable through every step of the process with all the contracts, permitting, Duke Energy net metering applications, etc. Honestly, there wasn't really anything for me to do for all those steps aside from sign some forms and approve the design plans. Day of the install they were right on time in the morning and had everything installed by mid afternoon. Everything was neat and tidy when complete and they happily accommodated some last minute changes to the equipment layout in order to have everything meet my expectations and standards. Post-install they've been super responsive with some further questions I've had. Nothing wrong with the system, just curiosities of mine. Would absolutely recommend them to anyone else!

Karl Buck
Apr 21, 2017

★★★★★ Executed a good overhaul on my damaged system. Great work!

Kerry Marx
Apr 13, 2017

★★★★★ NC Solar Now totally knows their business and conducts it pleasantly and professionally. They took care of everything from beginning to end, including the permitting with the power company. I can't think of one thing that wasn't A+!

Sam Byers
Mar 30, 2017

★★★★★ I was very impressed with all of the young men that came and put this system in. Ethan was great with the measuring and the picture taking. Nathan was the one that came in with several other very professional young men and installed the system. It was all done in three weeks time. I recommend five stars for NC Solar.

Bob Hunter
Mar 27, 2017

★★★★★ We are very happy to give a review for NC Solar. Everyone we dealt with at NC Solar was polite and helpful and also did an excellent job. They were eager to help and enthusiastic about their work and their product. Very few companies that we have worked with have been as easy to work with from start to finish. They were prompt and let us know if there was a change in schedule. We cannot say enough good about NC Solar. Bob & Sarah Hunter

George Woodbury
Mar 16, 2017

★★★★★ Extremely pleased with the system. We installed a 12kW system and over the past four months have had three months with no electric bill and one month where it was only \$40 whereas last year it was over \$250. I am an energy engineer and often assist municipal governments with setting up solar system contracts. NCSolar was very professional, did a remarkable job and are available if I have questions or need assistance in any way. I would highly recommend this company to anyone interested in a home solar system. In addition, my investment will return 35% in the first year (tax incentives plus energy savings) and roughly 12% every year thereafter.

Carla B. Zimmerman

Mar 11, 2017

This company was wonderful to work with, and I can highly recommend them for solar panel installation. Everyone was so knowledgeable, and if they didn't know the details of something, they took the time to research it and give me feedback. While my home was in the queue for installation, a newer solar panel product came on the market, and they upgraded my panels to keep the system as up to date as possible. My situation was a little different -- on-ground installation, in alluvial soil -- and it required the team to engineer a different concrete base. I was impressed that they took the effort to figure it all out and didn't just go with "the usual." The installation was very quick, and I appreciated that they cleaned up the site very well. They explained everything and answered all of my questions before they left and even now I can contact them, and they'll help me. My project was done in July 2016. I'm hoping I can save up some more money and add more panels someday. When I do, I'll give NC Solar Now a call!

Jason Oversmith

Feb 8, 2017

This is a great company to work with. After 4 years of having panels with them, they still are responsive to any issues that have come up. It is good to know that down the road they are still here to help out.

Fredrick Barber

Jan 23, 2017

As an active duty Army Logistics Officer, NC Solar Now showed me that solar power is both a fiscally and environmentally responsible use of our hard earned money. My system will pay for itself in about five to six short years, while making the planet a better place to live for future generations. My average bill dropped from about \$300 a month to under \$100 a month. Our family's experience with NC Solar Now furthered my desire to work within the renewable energy sector and assist with ushering in the clean-energy revolution. I would recommend NC Solar Now to anyone! Thanks for all you have done NC Solar Now!

Jacob Coats

Oct 13, 2016

NC Solar Now did everything. They're very great at explaining the process of how it all works, while figuring out what's best for you, and your budget. I live in a neighborhood and have a HOA, NC Solar even dealt with them for me. Not to mention it looks amazing. Just an overall professional and customer-oriented company. I would recommend them to anyone, no questions asked!!

Kate Cook

Oct 4, 2016

★★★★★ I had my solar panels installed about three months ago, and from start to finish the process was easy, and the system exceeded my expectations! I talked to a few other companies, but what I liked best about NC Solar was that the entire operation was turn-key. They measured the roof, brought the panels and brackets necessary, installed the system, did the electrical work and dealt with permits and my power company- I didn't have to do or pay anything after the sale! The price was straight-forward with no hidden fees or additional costs. Patrick was my sales person and he was very patient and knowledgeable. Electrical work is definitely not my mental forte, but he made everything easy to understand and was even great with my dog. The office staff and install team were extremely professional and helpful as well. It is clear that they are passionate about what they do and are committed to helping people go solar. Overall I am extremely pleased with my system and my power bill has been next to nothing. I would definitely recommend NC Solar to anyone.

Chris Browder

Aug 31, 2016

★★★★★ They did a fantastic job with my extremely complex solar + additional electric project. They were there when the first bill came to help decipher it and understand what my solar array is doing to lower the power bill. I would recommend them in a heartbeat to anyone considering solar for their home.

Shannon Parker

Aug 4, 2016

★★★★★ This company's customer service is a rarity these days! Our first call to them was due to an emergency leak in our Solar Panels in the house we purchased. They promptly responded and the technician, Reggie had all the tools ready & completed the job thoroughly. What has impressed me the most was my latest experience. I had a major concern regarding an invoice I received, more than once for services that were not done. Not only did their office call me back. They listened to my concerns and they went above and BEYOND to resolve my issue and lower the price for the service to satisfy me as a client. WOW! This level of customer service is unheard of! I will continue to do business with them because they demonstrated that they care about me as a customer. Thank you NC Solar Now!

Elizabeth Mullis

Jul 6, 2016

★★★★★ My husband and I look forward to our electric bill! I wanted to wait until we had our system up and running for a year before we posted our review and we can't be any happier. Our latest bill from Duke was less than \$10 and the highest bill we ever got last summer was only \$34! Everyone we came into contact with at NC Solar Now was wonderful and very knowledgeable, and the initial meeting with the sales representative felt more like an education than a pitch. They helped us make an informed decision. I must say the after sales care is great too. They contact us from time to time just to check in. So THANK YOU NC Solar Now! We should have done this years' sooner. Elizabeth Mullis

Brett Bruton
Jun 13, 2016

★★★★★ NC Solar Now was great to deal with, and the system is great. 1-day installation. Salespersons were very knowledgeable, and technicians know their stuff. \$17 power bill last month.

Arnold Hamm
Jun 9, 2016

★★★★★ Solar Now installed our solar pool heater in 2010. We've only had a couple of minor issues, which NC Solar now promptly addressed, at no cost. In 2011, the tornado that came through Raleigh came through our backyard; trees down everywhere and part of the pool fence collapsed, but the solar collectors withstood the storm without a scratch! I opened the pool a few day's before Memorial Day this year. The water temperature was 58° F. Within 9 days, the temperature was 88° F, just incredible! NC Solar Now's technology is wonderful and their customer service is spectacular. If you are interested in solar technology, NC Solar now is the go-to company for you.

Deborah Sparma
Apr 6, 2016

★★★★★ The folks at NC solar now are top-notch people to work with. Everybody from the sales team to the install team were absolutely professional and courteous. No one ever pressured me into buying and everybody answered any question I had. I would recommend NC solar now to anybody.

MARTYROSE Jenkins
Mar 31, 2016

★★★★★ CUSTOMER SATISFACTION Excellent CUSTOMER SATISFACTION WE HAVE JUST COMPLETED OUR INSTALLATION AND CONNECTION TO OUR SOLAR SYSTEM AND WE COULD NOT BE MORE PLEASED WITH THE SERVICE WE RECEIVED FROM NC SOLAR. WE INITIALLY JUST THOUGHT WE WOULD TALK TO THEM AND SEE IF WE THOUGHT IT WAS FEASIBLE FOR US TO CONVERT DUE TO OUR AGE AND THE PAYBACK WE WOULD GET. OUR DUKE ENERGY BILL SEEMED TO BE HEADING HIGHER AND HIGHER. FROM THE FIRST CONTACT WITH THE OFFICE TO OUR VISIT BY SALES REPRESENTATIVE MICAH WE WERE TREATED WITH EXEMPLARY COURTESY AND HELP. MICAH WAS NOT PUSHY, JUST EXPLAINED THE SYSTEM AND GAVE US THE PRICE AND TOLD US TO TAKE OUR TIME TO CONSIDER. WE TALKED ABOUT IT AND DECIDED TO GO AHEAD. THE COMPANY EVEN ARRANGED FOR CAROLINA ROOF COMPANY TO REPLACE OUR SHINGLES AND THIS COMPANY WAS GREAT TOO. THEY ARRIVED ON TIME ON SCHEDULED DAY AND WERE VERY EFFICIENT AND COMPETENT. LEFT THE AREA PROBABLY CLEANER THEN WHEN THEY ARRIVED AND DID SOME EXTRA THINGS, LIKE PAINTING THE VENTS TO BLEND IN WITH THE SHINGLES. AFTER THAT IT WAS WAITING FOR ALL THE PAPERWORK TO BE COMPLETED AND GET THE SOLAR PANELS ON. THIS WAS DONE ON SCHEDULE AND LOOKS GREAT. AFTER THE COMPLETION IT WAS JUST WAIT FOR DUKE TO CHANGE THE METER. AFTER THIS WAS DONE WE HAD A SMALL SITUATION WITH THE MICRO INVERTERS NOT COMMUNICATING WITH THE ENVOY AND WHEN WE CALLED THE COMPANY THEY HAD A TECHNICIAN AT OUR HOUSE WITHIN 30 MINUTES AND HE MADE ADJUSTMENTS AND IT WAS BETTER BUT NOT PERFECT SO JULIAN TOOK THE MATTER INTO HIS HANDS AND DID RESEARCH AND DECIDED TO HAVE THE ELECTRICIAN AND TECHNICIAN COME BACK TO THE HOUSE AND INSTALL A BETTER ACCESS FOR THE ENVOY. AFTER THIS WAS ACCOMPLISHED EVERYTHING WORKED IN TIP TOP SHAPE AND WE HIT OUR MAXIMUM POWER LEVEL THAT DAY. WE HAVE NOTHING BUT PRAISE FOR ALL THE PEOPLE WE CAME IN CONTACT WITH CHELSEA, WILL MICAH, NOAH, JORDAN, CHRIS BAKER, JULIAN AND THE COMPETENT MABRY'S ELECTRIC COMPANY AND CAROLINA ROOF COMPANY.

Eric Baucom

Mar 26, 2016

Hello! I am writing this review on behalf of West Raleigh Presbyterian Church, as we recently went solar with NC Solar Now. As a church, we have an abiding interest in caring for God's creation. As an Earth Care Congregation, we made a conscious decision to pursue solar in order to reduce our energy consumption and our carbon footprint. Our members came together in a special capital campaign, and together we raised the funds for our solar system. We solicited bids from three solar vendors. In the end, we chose NC Solar Now because their pricing was competitive and they were able to commit to an installation time frame that accommodated our needs. I'm thrilled to report that NC Solar Now not only met but in fact exceeded all of our expectations. First, the pricing and scope were right the first time; there was never any talk of change orders. Second, the installation was on schedule and was completed within the agreed-upon time frame. Once we had hired them, their commitment to staying on schedule was clearly a priority for them. Third, the installation process was smooth and painless. Their installation team was led by Karl S., who was phenomenal to work with. In particular, he was first rate in his communication; he called and updated us throughout the process, starting a few weeks ahead of the install date, and giving continual updates until installation was complete. Fourth, I am most impressed by how they handled the unexpected. We have an older facility, which presented some unusual challenges for their team. Our electrical system is from another era, using a fairly unusual 240V, 3ph, "high-leg delta" configuration. Their inverter was able to adapt to this. Finding a breaker to connect the inverters on our ancient switchgear was another issue. Their team worked diligently to resolve this issue, and I truly feel like they explored all options open to them until a good resolution was found. After 2 months of operation, one of our inverters failed. NC Solar Now replaced it without fuss in just a few days, completely under warranty. In the end, the project was truly 100% turnkey. That is a real blessing for a church, which relies on volunteer church members (like me) to coordinate projects like this. Support after the installation has been very responsive as well. We are very happy with the system, and we have been pleased with the lower power bills. Looking back, I don't see how we could have gotten any better service or results than those we got with NC Solar Now. Their commitment to quality work and great service is amongst the highest I've ever seen. If you or your church is considering solar, please feel free to contact us. We'd be happy to share more details of our wonderful experience.

Vest Rock

Mar 15, 2016

My experience with NC Solar Now was AAA+ from the first meeting with Patrick (one of the sales reps) to the installation. Nolan and his crew did a fantastic install and handle everything in a very timely and professional manner. I wish all of the businesses that I deal with were this courteous and professional. You guys Rock!

Sean Nuwer

Dec 8, 2015

I am extremely happy with the job NC Solar Now did installing solar on our home. From the site visit, to all the paperwork, and the installation, they took care of everything. They answered all my questions and explained everything so there were no surprises. They are a very organized and considerate company to work with. Everyone there was nice, professional, and polite. Our first full monthly bill after our meter was set was only \$12.80, which is the fee for the connection and meter and taxes that everyone pays on their bills. We actually overproduced our first month, and it was in October! Our system and NC Solar Now has exceeded all my expectations! I highly recommend NC Solar Now to anyone considering going solar!

Ingrid Fromm
Oct 20, 2015

We're so happy with our decision to choose NC Solar Now to handle our solar installation. From the moment I contacted the office, the entire staff was extremely friendly, knowledgeable, and helpful. NC Solar Now handled everything from start to finish (no paperwork for me!) and answered every question we had. The installation was amazingly quick (our neighbors were stunned!) and went off without a hitch. Luke, Logan, the rest of the crew, were all so kind, efficient, polite, and professional. They were all very considerate of the fact that I had two dogs in the house too. They left the property and my home exactly like they found, actually probably a bit cleaner. From the office staff, to the salespeople, to the installers—the entire company is the best there is. They informed us of the best solar system to get according to our needs and energy usage. We can monitor our usage online and after less than 10 days of solar use in our first bill, there was already significant savings! We can't wait to see the results for many years to come. We are so happy with our solar array and all the folks at NC Solar Now.

Jim Gulick
Sep 29, 2015

My wife and I decided to install solar panels on our house during the summer of 2014. NC Solar was well recommended and we contacted them and NC Solar installed 27 panels on the east-facing back roofs of our house. The NC Solar folks had us well prepared for the process and the installation went as planned and on schedule. They were very knowledgeable and good to work with. The engineers at NC Solar made calculations and estimated that we would be able to generate about 7.6 MWh in one year. We are two weeks short of one year and our panels have already generated 7.7 MWhs of energy. We have a fairly large home and have a heat pump and air conditioning that is all electric. So we have considerable cold weather and hot weather use. But this summer our electric bills were so vastly reduced that in July Duke Power sent a technician to check the meter, (even though they knew we had solar panels having had to install the special meter.) The meter was fine. The panels cut our summer demand from Duke in June by over 75% from last year. In that month alone, our production exceeded 1MWh.

Emily Etzel
Jul 2, 2015

Solar Now is the definition of a customer-oriented company. They handle absolutely everything. Our total experience with NC Solar Now has been excellent. We met them at the Greensboro Home Show, and a representative visited us a few days later. At that time we talked about feasibility, expectations of how much electricity we could generate, as well as costs. An expert designer arrived a few days later to actually go up on the roof to devise the most efficient method for generating power from our panels. In a single day our home was completely refitted – all the panels and inverters were installed on the roof and the electrical work to connect to the grid was ready to go. All that was needed was a visit from Duke Energy to replace their meter; that took 3.5 weeks. We turned it on and we are running. There is a website that continually provides information about how much energy is captured by 15-minute segments, by hour, by day and by month. It is simple to use. All this just happened. We did nothing, but sign the contract and give access to our house. When the workers finished, there was not a trace that they had been here – just the equipment on the roof. We are completely comfortable recommending NC Solar Now to anyone interested in going solar.

Clyde Zuber
Sep 24, 2015

NC Solar Now went out of their way to treat me as a valued customer. My situation did not justify the investment at this point, but I hope conditions may change in the future.

Hemang Pathak

Jun 25, 2015

★★★★★ Very professional people. Great work and support. Chris and Luke paid attention to every detail of the project. Love the monitoring system, Enlighten, for a minute by minute production report. My peak production is as expected and claimed by the panel manufacturers. Higher temperature reduces the electricity production and that is something the industry needs to work on. Seen substantial reduction on the electricity bill. I encourage people to put solar panels because that's the right thing to do. And till 2015, state and federal Govt. are subsidizing your bill.

Jim Roberts

Mar 11, 2015

★★★★★ When the NC Solar Now salesman came, I didn't know what to expect. Patrick was patient and answered all of our questions. By the end, my wife and I looked at each other and said, "This is a no brainer!" We bought them and the company has followed up with and came out to do some troubleshooting after we had one problem. They fixed it - service after the sale. They are there for us. I was so impressed that I applied for a job and have since joined the company. I wouldn't be interested in selling anything but I can really get behind this. It is the wave of the future and for the next 40 years, our panels will be producing electricity for us! I give an A+ rating to NC Solar Now.

Pete Ellum

Mar 10, 2015

★★★★★ NC Solar did a wonderful job on our home. They were extremely professional. We are very happy with the finished product.

Stuart Glover

Mar 5, 2015

★★★★★ NC Solar Now is the premier solar contractor in North Carolina. After conducting extensive market research, contractor interviews and estimate analysis we selected NC Solar Now to install our system. NC Solar Now provided us with reliable information throughout the process. They showed up when they said they would and they made sound recommendations in the site selection and sizing of our system. Quality and customer service is unmatched! From upper management through accounting, technical services and installation, I found NC Solar Now to be consummate professionals. They are highly motivated, technically competent and their reliability is unmatched!!! We look forward to expanding our system in the future with NC Solar Now.

Ron Crowson

Aug 4, 2014

NC Solar performed 4 major tasks on our 20 year old house including reflective insulation in the attic, new energy efficient shingles for the roof, new solar water heater for the swimming pool, and a gang of new PV electric panels for an east facing roof exposure. By Duke Energy records we went from one of the worst of 200 similar houses to number 1 of 200 similar houses for energy efficiency in this part of Wake County... Our monthly power bills were typically \$300 to \$400 per month....now we are not surprised to see power bills of \$75. The NC Solar installations have set us up for reduced monthly cost as we prepare to retire and become a fixed income household. We can now afford to live the rest of our years in the home we have always loved.

Kenny Rowland

Aug 2, 2014

Everything went well from beginning to end. All of our questions were answered and believe me, there were plenty. The installers were very professional and were in and out in no time. It seemed to take forever to get the new meter from Duke Energy Progress but it is in now and things seem to be going well. Thanks so much for the great job you did.

Marianne McIver

Jul 17, 2014

The process was so easy and is working as promised. My first power bill after installation of the PV panels was a credit. I also had pool heating installed and that has made the pool so comfortable that no one hesitates to jump in. The thermostat ensures a steady temperature of the water at 90 degrees.

Tony Cope

Jul 9, 2014

Such a great experience! Seriously! I had a PV (solar) system installed 2 years ago by another vendor - they are no longer in business. I just had an inverter go bad, and NC Solar Now repaired it within just a few days. Not only are they very responsive, they were open to talking with me about the repairs and what I thought would be a good option. The final fix was exactly what I wanted, and the system is up and running perfectly now. They also sincerely seem to appreciate my business - they are happy to take my calls. It's such an odd but very comforting experience - given what seems to pass for customer service at many places today. It feels so good to have a solid partner with my system.

I had a solar hot pool heating system installed by NC Solar Now this July. The install team was very thorough and everything is working perfectly. They were respectful of my home and made sure to clean up afterwards. The system is doing a great job of heating my pool, and is exactly what my wife and I wanted. We are looking forward to seeing how late in the season we can enjoy our pool!

★★★★★ The PV installation was virtually flawless. I worked with Karl beforehand to schedule a time that the weather would not interfere with. Karl was also able to limit my inconvenience by scheduling the inspector to come out the same day. The work crew was scheduled to arrive around 9:30 am. The electricians from Mabry's showed up at 9am and were able to scout out their part of the work by the time the rest of the crew arrived at 9:30am. The electricians (after cleaning up where necessary) were finished and gone by 1pm. Logan was onsite the majority of the time and readily available to answer questions and solve problems. The work was far enough along by 2pm to pass inspection and was completed by 3pm. Logan remained for a while to go over the system and conduct a test to ensure its operation. Once Piedmont Electric replaced my meter, both Karl and Logan were readily available to answer questions, ensuring that the system could be fully operational in minimal time. For PV panel installations, I would not hesitate to recommend NC Solar Now.

★★★★★ I am extremely pleased with our Pool Solar Heating.... We were able to swim in April, three months earlier than last year. The work was performed in a very timely manner with excellent workmanship. The main supervisor on site was very detail oriented and particular - this was very refreshing to find a company with such high standards. Operational guidance and instruction was presented very completely to us. The system has performed perfectly... and we will now be able to extend our swimming season by double.... I would recommend NC Solar to anyone. I am also considering utilizing their services with my future solar needs such as hot water heating.

★★★★★ I would highly recommend NC Solar Now. Greg came out to our house and explained the entire system and how long it would take to install. He answered about a million questions from us. Karl our installer was friendly, efficient and very professional. The system has exceeded all of our expectations and the entire staff was great from beginning to end!
